## Topics

### An excellent recommendation rate

This summer's newsletter is the opportunity to thank our clients who answered our Customer satisfaction survey in June: To the question "Would you recommend the SIL to a partner?", 93.1% of the answers were "Yes".

The results, were presented during the strategic meeting at the end of fiscal year in June.

### New SIL installations worldwide

Three Ruscam plants in Russia (Sisecam Group) are going to be equipped with the SIL solution soon. Vertech' had installed the SIL in the first Ruscam plant in 2012.

Great news to start Vertech's 2015-2016 year with!

## SILC 2015 : Discarding a mould

### SIL 2015 offers several improvements concerning mould discard orders

It is now possible to **change the reason for mould rejection, by clicking twice on a mould reference, then choosing a new defect.**

A specific message is sent to the hot end, and Notepad and SILC screens are updated.

It is now possible to **reject a mould from the hot end.**

The start for systematic rejection can be launched with a lehr time, depending on the critical level of the defect. A message is then sent to the cold end to warn the Operator.

### Save time! Send a mould discard order directly from the setout screen.

No need to change screens anymore in the setout view. After selecting mould-defects, it is possible to send an order for mould rejection. The rejection command is sent when the setout is validated.

### Systematic rejection display

The Cavity view (F4), shows where the systematic rejection order was sent from:

- (continuous line) from the cold end
- - - (dotted line) from the hot end

The information appears in the emails and is saved in Notepad.

## Intra Vertech'

Vertech' will attend the 39<sup>th</sup> AFGM Conference in Cebu, Philippines, October 19 - 23. Vertech' is a co-sponsor of the Farewell Gala Dinner on October 22 .

Consult our HowTo: helpful and concise, HowTo are short procedures with print screens made to assist you.

The HowTo procedures complement the existing manuals and are available on our website or by request at [sales@vertech.eu](mailto:sales@vertech.eu)

In case you have a particular request for the creation of a new HowTo (Example: How to discard a mould in SILC?) please contact us.

Survey question: Click on the link you agree with

I feel I know the new SIL functionalities well enough:
